6Kg/15Kg x 2/5g

Prices from £1100+ VAT & Delivery

Ishida UNI-5 & UNI-7 Series:

The Ishida UNI Series features advanced touch screen technology. Pre-loaded with stable, proven and flexible software. The latest, high performance, solid state on-board flash memory negates the need for unreliable hard drives and unnecessary operating systems.

Both Uni-5 and Uni-7 run the same software and can be run on the same network. The main differences are the Uni-5 has a monochrome customer rear display and doesn't use the cassette loading system that the Uni-7 does.

The UNI-7 Series has a stylish modern design with the benefits of being able to switch between label printing and cash control system in seconds. It has full bovine traceability and is one of the easy system to use on the market.

Features:

- 7" Colour Touch Screen
- Barcode printing (can be used by our cash registers)
- Graphic colour display for easy programming
- Graphical customers display (Uni-5 = Monochrome Uni-7 = Colour)
- Free format label printing with variable logo support
- 4 Different designs to suit all environments
- 5000 + PLU's (Depends on memory card)
- 48 Preset hard keys for most popular PLU's
- Full Beef traceability
- Front loading label / receipt cassettes (Uni-7 Only)
- Plate Size 395 x 270mm
- 6Kg x 2g / 15Kg x 5g Dual capacity load cell
- Label & receipt printing
- Barcode scanner interface
- Cash draw connection
- USB Port (For backing up system data and importing images)
- Compact Flash upgradeable memory card
- Network Card
