

SSEC-PSU PALLET SCALE

The SSEC PSU is a U shaped platform scales, The open front allows loading using hand pallet truck, and is fitted with wheels for complete mobility.

Standard features

- Heavy duty mild steel construction
- Adjustable levelling feet.
- Hard Wearing powder coated finish
- IP67 load cells

Additional options

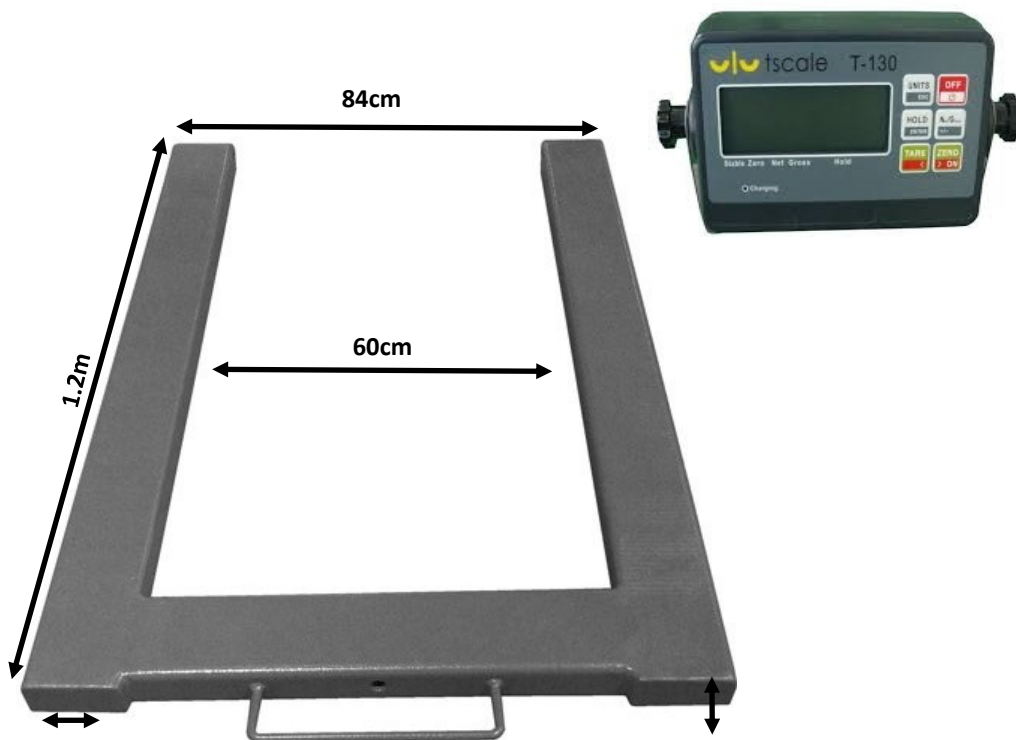

- Weights and measures approved
- Bespoke sizes available

Power

- 230v/120v input, DC 9V output
- Configurable auto power
- Rechargeable battery
- Low battery indicator

Capacities

- 1000kg x 200g
- 2000KG X 500G
- 3000kg x 1kg

SSEC-PSP PLATFORM SCALE

PLATFORM SCALES

SSEC PSP

The SSEC PSP provides a low cost solution for weighing pallets and other heavy items. Its low profile design makes it easy to load and reduces manual handling.

Standard features

- Heavy duty mild steel construction
- Hard Wearing powder coated finish
- Adjustable levelling feet
- IP67 load cells
- Wall mounted indicator

Additional options

- Weights and measures approved
- Bespoke sizes and capacities available

Power

- 230v/120v input, DC 9V output
- Configurable auto power off setting
- Rechargeable battery
- Low battery indicator

Capacities

- 2000kg x 500g
- 3000kg x 1kg

SSEC-EL BAGGING SYSTEM

With our bespoke manufacturing facilities, our hopper systems can be adapted for any application, and can be configured to work with your existing plant.

Standard features

- High Accuracy weighing system
- Adjustable bag height
- Sliding goods plate
- Adjustable Sealer height
- Configurable target weight
- Inflight compensation
- Reciprocating feeder tray
- Impulse heat sealer

Power

- Single phase 230v ac 10A

Additional options

- Weights and measures approved
- Hand stitcher
- Pneumatic bag clamp
- Remote Start
- Nett weighing
- Twin speed

Capacities

- HOPPER 2000 kg
- SCALE 60kg
- Resolution 20g

SSEC-DH BAGGING SYSTEM

The SSEC-DH is a stand alone semi automatic bagging system, it is manufactured to a high specification and suitable for a variety of both wet and dry materials.

Standard features

- High Accuracy weighing system
- Adjustable bag height
- Sliding goods plate
- Adjustable Sealer height
- Configurable target weight
- Inflight compensation
- Reciprocating feeder tray
- Impulse heat sealer
- External cone vibrator

Additional options

- Weights and measures approved
- Hand stitcher
- Pneumatic bag clamp
- Remote Start
- Nett weighing
- Twin speed

Capacities

- HOPPER 2000 kg
- SCALE 100kg
- Resolution 20g

SSEC-FIBC BAGGING SYSTEM

The SSEC FIBC is a complete bagging system for accurately filling FIBC bags

Standard features

- High Accuracy weighing system
- Adjustable bag height
- Sliding goods plate
- Configurable target weight
- Inflight compensation
- Reciprocating feeder tray
- External Vibrator

Power

- Single phase 230v ac 10A

Additional options

- Weights and measures approved
- Remote Start
- Nett weighing
- Twin speed
- Spill plates (for extra capacity)

Capacities

- HOPPER 7000 kg (approx)
- SCALE 1500kg
- Resolution 500g
